CLIENT DUE DILIGENCE BRIEF

AUDIT TRAIL #DV-CLIENT-2026

Protecting Every Shilling You Remit Home

For years, building or investing in Kenya from London, Dallas, Dubai, or Toronto meant taking blind leaps of faith. DiasporaVerify replaces hearsay and WhatsApp snapshots with calibrated on-ground verification, cryptographic evidence, and stop-payment safeguards.

1. The Transformation: Where We Were vs. Where We Are Right Now

01 / BEFORE & AFTER

Compare the traditional risks of remote investing with the institutional safeguards now active on your DiasporaVerify portal:

KEY AREA	WHERE WE WERE (THE OLD WAY)	WHERE WE ARE RIGHT NOW (DIASPORAVERIFY STANDARD)
1. Photographic Evidence	UNVERIFIED Blurry WhatsApp photos sent by contractors or relatives. Impossible to tell when, where, or even whose house was in the picture. No timestamp or GPS coordinate.	CRYPTOGRAPHIC PROOF Every image is stamped with **SHA-256 digital hashing**, camera orientation angles, and geocoded coordinates. Certified immutable and tamper-evident.
2. On-Site Presence	ZERO ACCOUNTABILITY People claimed they "went to the plot" while sitting in a restaurant in Nairobi. No way to confirm physical site arrival.	GPS GEOFENCED CHECK-IN Field verifiers must physically enter within **150 meters** of your parcel's survey beacons to execute arrival check-in and unlock the inspection checklist.
3. Contractor Payments	BLIND WIRE TRANSFERS Contractor demands: *"Send KES 450,000 for the slab today or work stops."* You send the full amount only to find out 80 bags of cement were stolen.	STOP-PAYMENT SAFEGUARDS The portal audits materials stock and work-in-progress. If variance occurs, our desk issues an explicit **Stop-Payment Advisory** and authorizes partial release (verified materials only).
4. Inspector Independence	COLLUSION & BRIBERY Contractors bribe family members or caretakers with "lunch" to confirm	RULE 2 ZERO-CONTACT LEAK Operatives sign legally binding Conflict of Interest disclosures. Strict bi-

	incomplete or shoddy work as complete.	directional PII masking ensures verifiers and contractors never collude or bypass Nairobi HQ.
5. Booking & Timezones	FRUSTRATING DELAYS Endless back-and-forth messages across 7 to 11 hour timezone gaps trying to agree on when someone can visit your land.	DUAL-TIMEZONE SYNCHRONIZER Real-time appointment calendar automatically syncing your local time (UK, USA, UAE, EU, Australia) with Nairobi EAT and sending calendar invites (.ics).
6. Multi-Currency Ledger	HIDDEN FX TARIFFS Obscure bank conversion rates, double currency hops, and zero itemized tax receipts for diaspora income tax deductions.	7 DIASPORA CURRENCIES Instant transparent conversions across KES, USD, GBP, EUR, AED, CAD, and AUD with official downloadable PDF tax receipts.

2. Active Features on Your Portal Today

02 / LIVE CAPABILITIES

Before/After Slider

Compare consecutive site visits from fixed camera angles. Slide across to verify if walling or columns progressed or stalled.

`View: /construction`

Video Walkthroughs

Watch calibrated 4-minute site video inspections with timestamp markers pointing out rebar spacing, cracks, and materials storage.

`View: /construction`

Stop-Payment Desk

One-click instructions to your contractor: Authorize Partial (verified work), Pause Disbursement, or Enforce Dispute Hold.

`View: /payments`

Global Bookings

Schedule consultations with our Nairobi desk in your local timezone with synchronized calendar reminders.

`View: /book`

Evidence Vault

Browse certified inspection dossiers filtered by county, status, or category, complete with printable PDF exports.

`View: /reports`

Formal Disputes

If an operative or contractor's report seems questionable, escalate directly to Senior Coordinators for free re-inspection.

`View: /disputes`

3. How a Real Verification Works: Step by Step

03 / WORKFLOW

Example: Kajiado County Residential Villa Milestone 3 (Ref: DV-2026-KJD-0104)

REAL SYSTEM CASE

Here is how DiasporaVerify protected a client residing in London from losing KES 300,000 on an unverified slab claim:

`STEP 01: CLAIM`

Contractor Invoiced

Contractor requested KES 450,000 claiming first floor lintel beam and slab reinforcement was 100% complete.

`STEP 02: DISPATCH`

Ground Operative

BORAQS-registered structural inspector arrived on site; verified entry within 35m of survey beacons via GPS.

`STEP 03: AUDIT`

Variance Found

Physical inspection revealed formwork was only 40% complete; 80 bags of cement (KES 68,000) were missing from the shed.

`STEP 04: ACTION`

Stop-Payment

Client authorized KES 150,000 for verified materials only, holding KES 300,000 until rebar inspection passed.

4. What You Can Do Immediately on the Platform

04 / IMMEDIATE ACTIONS

3 Things You Can Try in Your Account Right Now:

1. **Inspect Construction Discrepancies**: Go to **/construction** to test the before/after photo slider, watch the 4-minute geotagged video inspection, and simulate releasing partial payments.
2. **Book an Operations Appointment**: Go to **/book** to pick a consultation time in your local city timezone (UK, USA, UAE, etc.) and download your calendar invitation.
3. **Review the Escrow Ledger**: Go to **/payments** to switch between 7 global currencies, view itemized inspection fees, and inspect the official printable tax receipt.

OUR SERVICE BOUNDARY COMMITMENT

"DiasporaVerify is an independent observation authority. We never manage your builders, touch your construction capital, or act as biased brokers. We exist strictly to give you eyes on the ground, verified data, and peace of mind."
